Agree TT headers and such not needed. Please clean and send back. Looks good for now, but Water Division will probably have comments....

How's this look? It went over 1 page but I think it is all relevant and the Tt header and footer are probably not needed.

Eurofins, we are not providing the Wolverine data to residents. MDEQ is doing that.

Sure, I'll see what I can pull together.

Do we want this to just cover the lab reports from Eurofins or to also help explain the lab reports they have already received from Wolverine? The Wolverine lab reports are likely to contain a different set of acronyms (RL vs PQL vs LOQ, etc.) so if we want to try to cover all possibilities I may need to get my hands on a report from Wolverine. Not sure if Milo or Jennifer would have these but I could look into that if needed.

I'll get started on formulating a "Lab Analysis Report Key" for what we know we have from Eurofins lab reports in the meantime.

Brent,

Several residents have said they don't understand the data from the lab. Specifically they asked what does "J" mean, what is "RL", what is ND???

Take a look at the data results and come up with a description sheet we can attach the residential letter.

Can you do this today??

Thank you, Jeff Kimble, US EPA
